Elizabeth – Do we have anything on this:

- a) ORD and OW – need to harmonize with the EPW budget hearing’s 2 questions/responses on USE IT when we have it. DWPD and RMES

#### **QFR: February 2021**

Section 102(b)(6)(C)(ii) in Division S of the Consolidated Appropriations Act of 2021 requires the EPA Administrator, no later than one year after the enactment of the USE IT Act, in consultation with the Secretary of Energy, and, as appropriate, with the head of any other relevant federal agency and relevant stakeholders, to prepare, submit to Congress, and make publicly available a report that includes—

- (I) A comprehensive identification of potential risks and benefits to project developers associated with increased storage of carbon dioxide captured from stationary sources in deep saline formations, using existing research;
- (II) Recommendations for managing the potential risks identified under subclause (I), including potential risks unique to public land; and
- (III) Recommendations for federal legislation or other policy changes to mitigate any potential risks identified under subclause (I).

Do you commit to ensuring the agency will release and submit this report within the time period established by the USE IT Act?

**Subject:** RE: EPW request for a USE IT update

This follows up on your conversation with Anita yesterday about the USE IT briefing for EPW that OCIR is planning. OCIR’s feedback re whether this could be done some other way (e.g., in writing) is that it will be a briefing. They have sent the invite for the internal prep meeting with Radha to Anita with the understanding that she will speak for the UIC program at the briefing. (Greg also understands.)

I will let you know when we have a briefing date with EPW on the calendar.

**Subject:** FW: EPW request for a USE IT update

Hi Jennifer and Yu-Ting,

This is a heads up based on conversations and an email from OCIR that plans for EPA to brief the Hill on USE IT Act implementation are taking shape, in the form of a call in June with Senate staff from SEPW and possibly from the Energy & Natural Resources Committee. (Not clear whether this would be for one or both sides of the aisle). This briefing would be separate from CEQ's efforts to inform the Hill. OCIR is aware of the CEQ effort and of EPA's ongoing coordination, through OAR, with CEQ.

OCIR would like to keep the briefing to a status update on several discreet topics listed below, which for us is the deep saline formations report, and is suggesting that the primary briefers would be congressional team members with technical experts available on the line—for us, Greg Spraul and Bill Bates. Please let me know whether this works for OGWDW.

OCIR is also requesting program feedback on several items. I have highlighted those below and added some thoughts (red font) about who among us would be involved in putting together a reply to OCIR.

Welcoming others to jump in if there is something that should be added to the above,

Elizabeth

PS – Previous plans for a Hill briefing were that EPA would participate in a larger interagency briefing led by DOE. It is not clear yet how those plans may shape up.

**Subject:** EPW request for a USE IT update

Hi All – Last Friday I emailed you about USE IT, and now this Friday, I have another update for you: Time for a pivot!

EPA is going to provide a status update for EPW committee staff on the 3 specific USE IT topics where EPA is the lead (topics listed below).

With this email I am 1) sharing parameters of this update and 2) asking for your feedback.

## **Ex. 5 Deliberative Process (DP)**

1)Parameters of the update:

The topics and suggested speakers are:

## **Ex. 5 Deliberative Process (DP)**

I suggest this speaker arrangement in an effort to reduce the burden on program leadership teams and to reduce the burden on the technical staff implementing this program. In addition, this arrangement should facilitate having a update call shortly after Memorial Day holiday.

2)Request for feedback:

## **Ex. 5 Deliberative Process (DP)**

Don't hesitate to call/email. I'm happy to answer any questions or clarify anything here. After this Friday, I'm on AL through June 16<sup>th</sup>. Please include my supervisor, Pat Haman, on any replies - - thank you!

Karen.

**Subject:** RE: Hill request for USE IT briefing

Hi All – Thank you to ORD, OW, OP and OAR for sharing your feedback on status of standing up a new program of USE IT activities in your offices. It was helpful in prepping to talk to the staffers.

I have connected with most of you with the latest by now, but just in case – Radha has indicated that DOE will take the lead on a briefing for USE IT. I'll reach out if/when I have an update.

Also, FYSA since some offices have been working with CEQ on USE IT provisions: Yesterday a bipartisan group of senators (Capito, Whitehouse, Barrasso, Manchin + others) sent a letter yesterday to CEQ about USE IT implementation. The senators want a full accounting of CEQ's progress on USE IT by early June, and regular updates every 3 months.

Don't hesitate to reach out if you have any questions or would like any clarification.

Karen.

**Subject:** Hill request for USE IT briefing

Hi All,

Radha got a request for a briefing on EPA's progress in implementing the USE IT Act. I'm reaching out to you because your office may have a role in USE IT.

USE IT was a part of the FY2021 Omnibus signed into law at the end of last year.

The request for a briefing originated with SEPW minority, but EPA will invite a larger set of offices given the bipartisan interest in both chambers. We're aiming to provide the briefing in the next couple of weeks.

I'll give you a call next week to discuss what, if any, work your office may have initiated from USE IT. If nothing has been started, let me know. In addition, it might be useful for us to talk as a group as well. Based on feedback from your office and feedback from Radha, I'll come up with some parameters for any kind of briefing that is provided. I welcome any feedback you might have.

Attached is the USE IT language and here is a brief list of USE IT EPA provisions:

- Directs EPA to establish a competitive prize program that awards funds to direct air capture research projects to reduce CO2 from stationary sources.
- Authorizes the establishment of a Direct Air Capture Technology Advisory Board of experts to advise the Administrator.
- Requires EPA to prepare a report regarding carbon dioxide storage in deep saline formations, in consultation with DOE.
- Directs GAO to submit a report to Congress, not later than 5 years after enactment, identifying Federal grant programs regarding carbon capture and utilization technology research and examining any overlap or duplication.
- Requires DOE, in consultation with EPA, to carry out a research, development, demonstration, and commercialization program for carbon utilization.
- Directs DOE and EPA to have the National Academies conduct a study examining the barriers and opportunities related to commercial application of CO2.
- Not later than 180 days after enactment, CEQ, EPA and other Departments will also compile a report on relevant Federal permitting and review information for project developers in the carbon capture, utilization, sequestration (CCUS) space.
- Serve on a task force established by CEQ that will identify successes and challenges faced by developers and operators of CCUS projects and CO2 pipelines, and make recommendations to improve the permitting and regional coordination for efficient, orderly and responsible development of such projects.

Former EPW Chairman Barrasso's press release highlighting USE IT becoming law has some context. It's available [here](#). Attached is the OCIR email that went out to EPA and program office leadership on EPA items in the FY2021 Omnibus.

Let me know if you have any questions or need any more info. Talk to you next week - -

Karen.
